A compact radio that provides better and faster fleet productivity solutions

This radio features large controls that are easy to grip or press even when wearing gloves. The powerful 4W speaker is forward-facing (instead of on top of the radio) for superior clarity. Three color LED indicators (red, yellow, green) show visible feedback of transmit, scan and monitor status. The microphone and controls are located on

the left, closest to the driver for easy reach, and bright visual indicators can be read at a glance. Both features that help drivers keep their eyes on the road. This design and simple operation make this radio ideal for retail, hospitality, manufacturing, delivery services and taxi and limousine companies.
